Rivera

(54) Title:
SYSTEM AND METHOD FOR RENDERING A VERSION-CONTROL HISTORY AS A NARRATIVE STORY

(72) Inventor:
Alex Rivera

(51) Field:
Developer tools; data storytelling

(58) Drawings:
3 figures on 3 sheets

(57) ABSTRACT

A collector (110) reads commit records from one or more repositories (102) and computes a set of statistics (112), including activity rhythm, streaks and a personality archetype. A language model (120) writes captions grounded in those statistics, and a builder (130) renders a sequence of story cards (210) for display on a handheld device (200). An exporter (140) produces still images and a video suitable for sharing. Quoted commit text is screened before export.

REFERENCE NUMERALS

100 Story system
102 Repositories
110 Collector
112 Statistics
120 Language model caption writer
122 Privacy screen
130 Story builder
140 Exporter
150 Images and video
200 Handheld device
204 Side button
210 Story card
212 Progress indicator
214 Activity chart
220 Dock
302 Read commit records for an author and…
304 Compute rhythm, streak, languages and…
306 Generate captions from the statistics
308 Every number found in the statistics?
310 Quoted text safe to share?
312 Remove card or ask the author
314 Render story cards, images and video

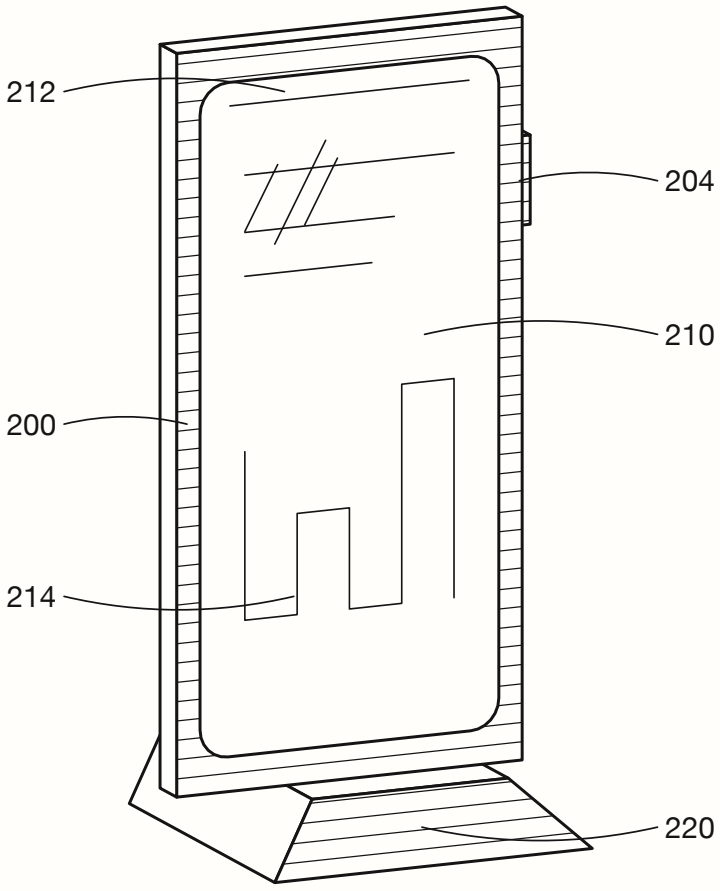

FIG. 1

Drawn with patent-drawing, a Claude skill. Not a filed or issued patent.
