Rivera

(54) Title:
SELF-STIRRING BEVERAGE VESSEL WITH SUGAR DISSOLUTION DETECTION

(72) Inventor:
Alex Rivera

(51) Field:
Kitchenware; small appliances; mornings

(58) Drawings:
4 figures on 4 sheets

(57) ABSTRACT

A beverage vessel (10) rests on a powered base (20). A magnet (32) in the base turns an impeller (30) sealed in the floor of the vessel, stirring the beverage without a spoon. A temperature sensor (24) and a controller estimate when added sugar has fully dissolved, stop the impeller, and sound a short, triumphant chime. The handle (12) is positioned for either hand, and the base charges wirelessly.

REFERENCE NUMERALS

10	Beverage vessel
12	Handle
14	Splash lid
20	Powered base
22	Charging coil
24	Temperature sensor
26	Start button
30	Impeller
32	Drive magnet
34	Spindle
40	Direction of stirring
302	Detect vessel placed on base
304	Measure beverage temperature and suga…
306	Spin impeller at stirring speed
308	Sugar dissolved?
310	Stop impeller and play triumphant chi…
402	Controller
404	Motor driver
406	Battery
408	Radio
410	Chime speaker
412	Phone app

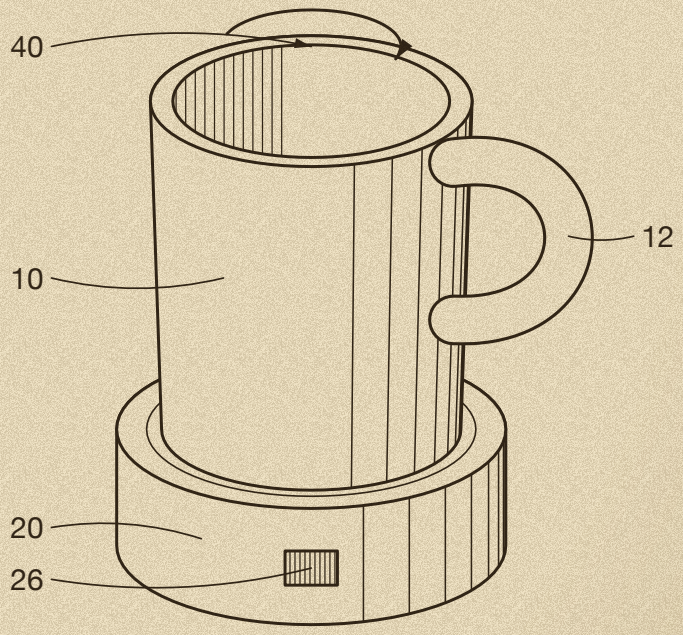

FIG. 1

Drawn with patent-drawing, a Claude skill. Not a filed or issued patent.

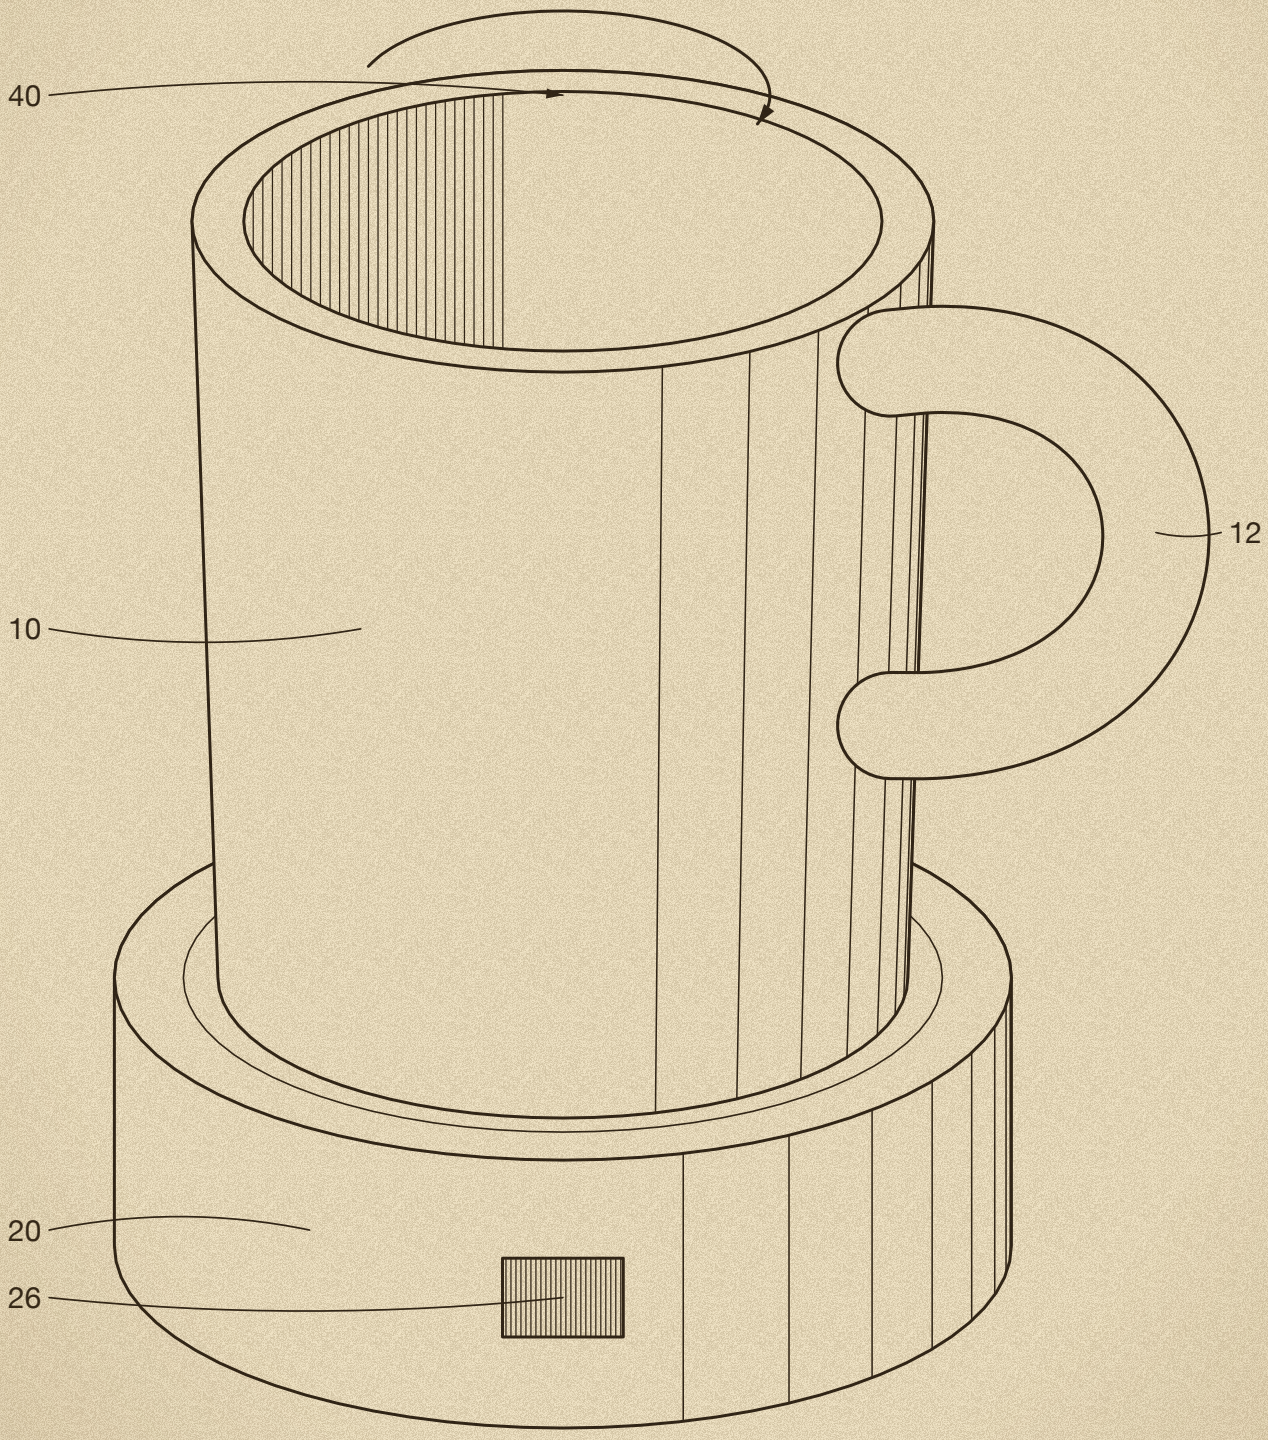

FIG. 1

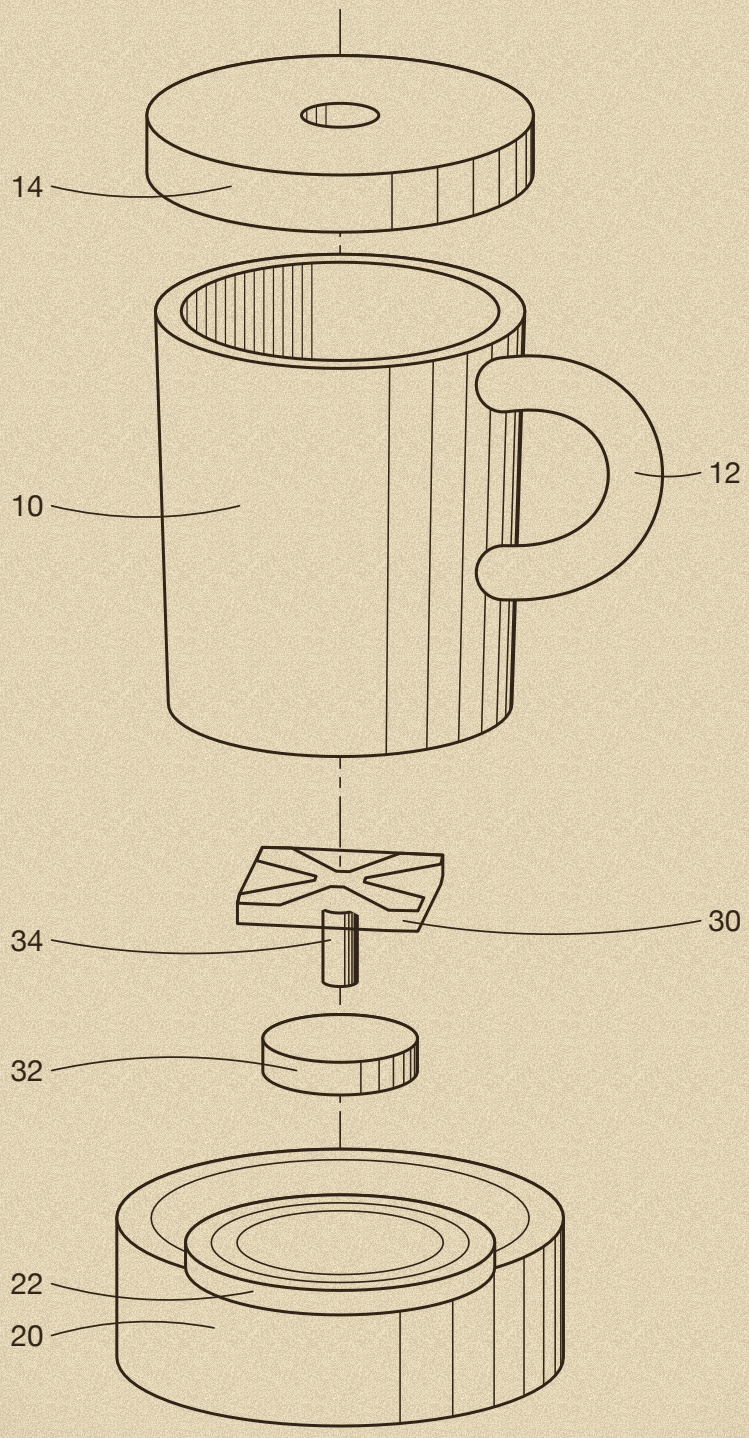

FIG. 2

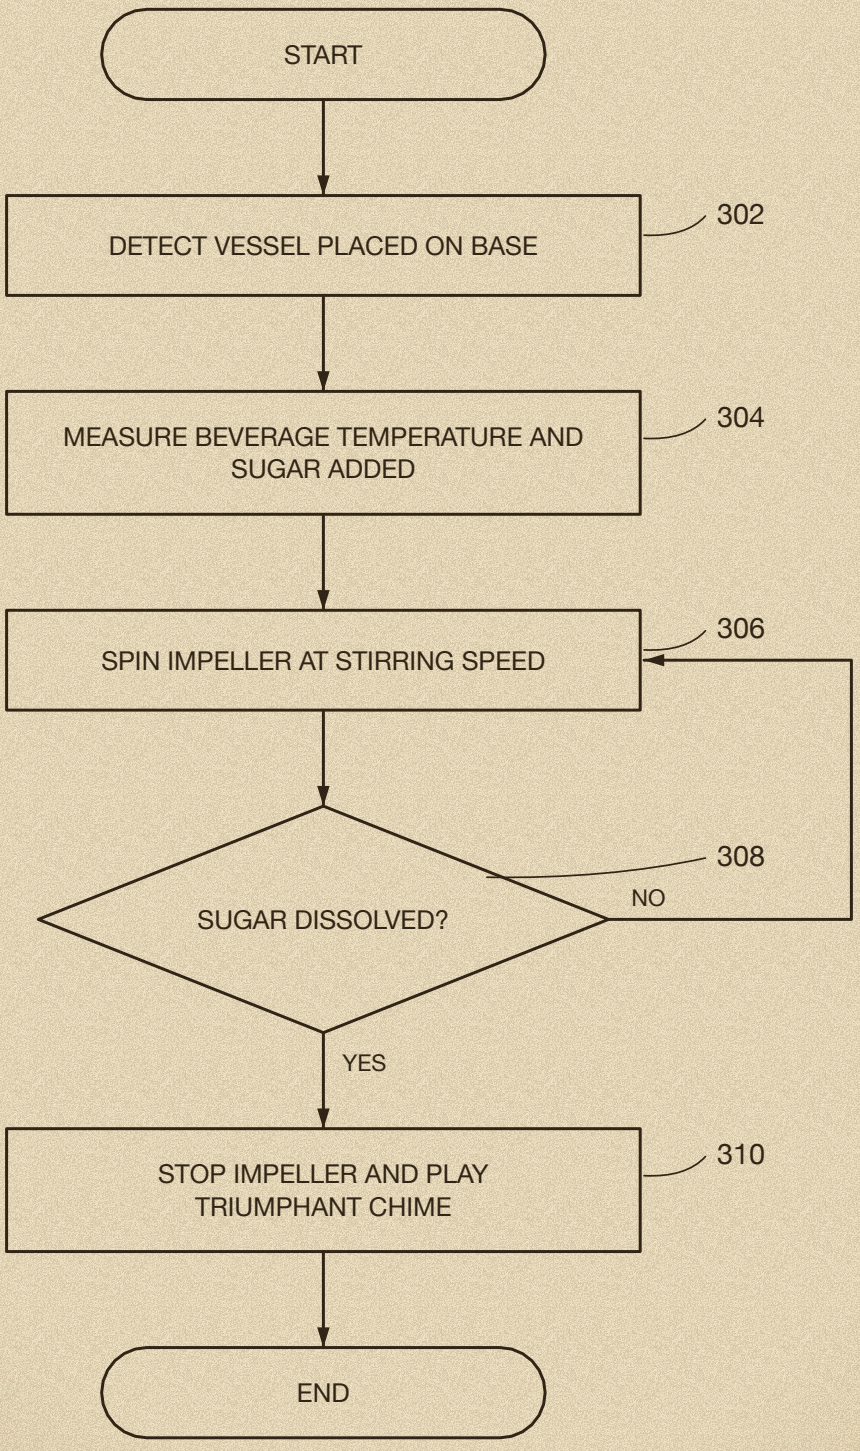

START
DETECT VESSEL PLACED ON BASE
302
MEASURE BEVERAGE TEMPERATURE AND SUGAR ADDED
304
SPIN IMPELLER AT STIRRING SPEED
306
SUGAR DISSOLVED?
308
NO
YES
STOP IMPELLER AND PLAY TRIUMPHANT CHIME
310
END

FIG. 3

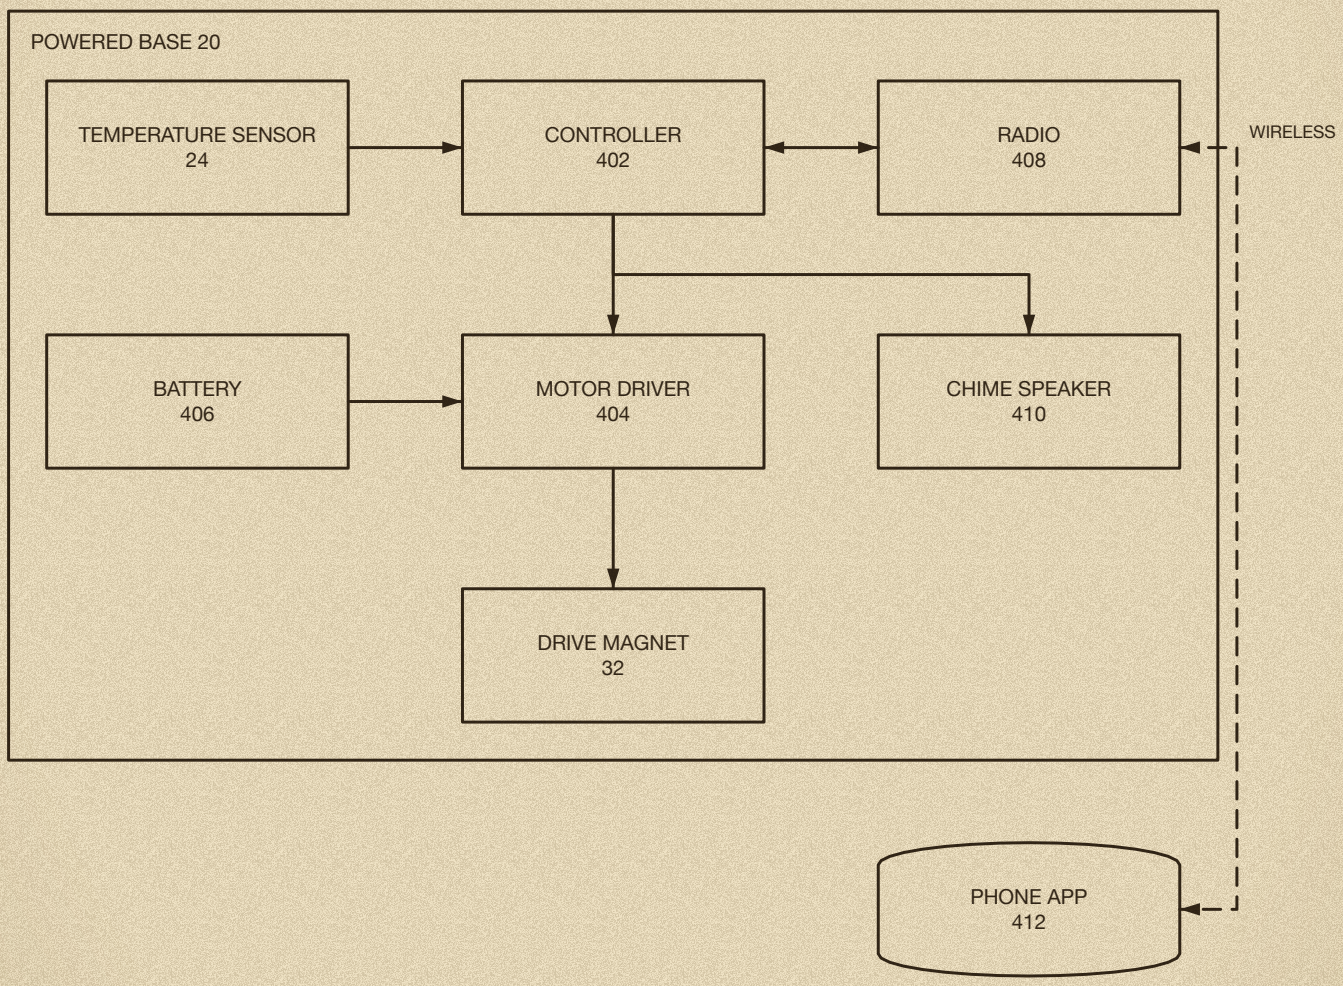

POWERED BASE 20
TEMPERATURE SENSOR
24
CONTROLLER
402
RADIO
408
WIRELESS
BATTERY
406
MOTOR DRIVER
404
CHIME SPEAKER
410
DRIVE MAGNET
32
PHONE APP
